

### Northwestern Memorial Hospital Chicago, IL

In 1992, Northwestern Memorial Hospital took an innovative approach with regards to their infection control and prevention program by applying the AEGIS Microbe Shield technology in their facility.

“We have used the AEGIS product for over 10 years to reduce environmental contaminants. We apply AEGIS liberally on most of our renovation and all new construction in critical care and other high risk areas. We have not had a single nosocomial Aspergillosis infection since 1992.” ~ Sandra Reiner, R.N., B.S.N., C.I.C.

### New Prentice Women's Hospital – NMH Chicago, IL

Northwestern Memorial Hospital is in the process of building the new Prentice Women's Hospital, a state-of-the-art facility dedicated to women's healthcare. This nearly one million square foot facility is scheduled to open in 2007. The Infection Control and Prevention Team at NMH have been so satisfied with the results of the AEGIS treatment at the main campus, they are applying the AEGIS Microbe Shield throughout this new facility, especially in the high risk areas.

#### **Outcomes:**

- No nosocomial Aspergillosis infections since 1992.
- Reduced environmental contaminants.
- Continued use of the AEGIS Microbe Shield® for over 10 years.
