

Federal Law Enforcement Training Center – Artesia, NM

Client Challenge:

The Federal Law Enforcement Training Center (FLETC) in Artesia, New Mexico operates with the sole purpose of training those who protect our homeland. This training division is responsible for designing, developing, coordinating and administering advanced and specialized training for the United States Border Patrol, Bureau of Indian Affairs, Transportation Security Administration and other partnering organizations. With such advanced and specialized training, FLETC Artesia saw the need to protect students and instructors from any possible indoor air quality concerns while gaining LEED™ points.

IEQ Solution:

To treat the 27,000 sq. ft. training and command center, GAP™ Technology consisting of two 4000 AHU's at 10,000 CFM each were installed to defend against chemical and biological threats as well as combat possible mold and odor issues.

Result:

The Federal Law Enforcement Training Center in Artesia, NM is a tremendous asset to the Department of Homeland Security, training over 60,000 law enforcement professionals annually. By installing GAP™ Technology, FLETC Artesia can be proud of their first line of defense against air quality threats to their facility.
